

STAIR CLIMBER

Simple transportation method for straight flights of stairs

STAIRMAX

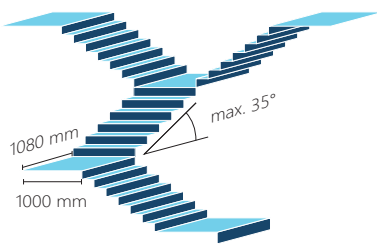

UNIQUE

The only self-propelled stair climber that can be used in your own wheelchair without assistance. This requires a small adaptation to the wheelchair frame.

COMPACT

The Stairmax makes it easy to turn and turn to the desired position on narrow landings with a width of only one meter.

Space requirement

PUBLIC

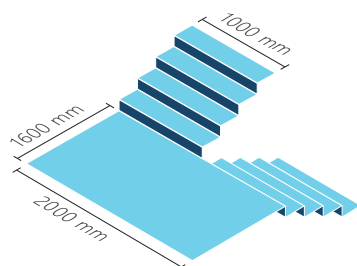

DIVERSE

With the Public stair climber, all types of wheelchairs - whether manual or electric - can be transported easily and safely.

ROBUST

Perfectly suited for use in public buildings thanks to the powerful drive, stable construction and numerous safety functions.

Space requirement

STAIR CLIMBER

Simple transportation method for straight flights of stairs

SA-3/S

FLEXIBLE

The sophisticated fastening system allows wheelchairs of all kinds to be attached. The stair climber can be easily dismantled and transported to different locations.

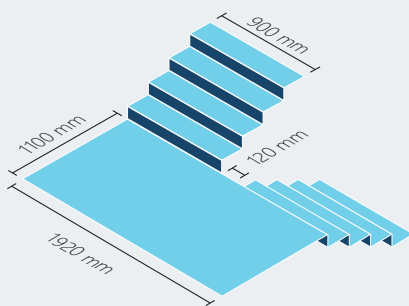

STRONG

Sturdy, self-supporting construction makes transportation very comfortable. Staircases with a gradient of up to 35° or up to 30 floors are no problem for the stairclimber.

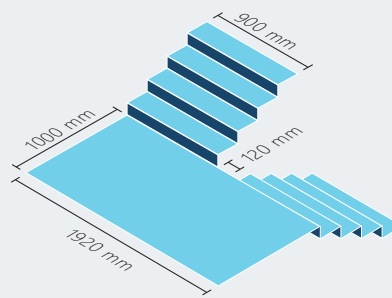

Space requirement SA-3

The SA-3 is characterized by its increased load capacity of 160 kg.

Space requirement SA-S

The SA-S is 80 mm shorter and can be used on very narrow stairs.
